WORK EXPERIENCE

[01/11/2022 – Current]

Ph.D. Student

Sapienza University of Rome

City: Rome | **Country:** Italy | **Name of unit or department:** Mechanical and Aerospace Engineering Department (DIMA)

I am currently enrolled in a Ph.D. program in Theoretical and Applied Mechanics. My research focuses on phase transitions, specifically the formation of bubbles and droplets. The approach used combines fluctuating hydrodynamics, through a diffuse interface model, with rare event techniques. The ultimate goal is to develop a model capable of accurately describing the formation and evolution of droplets and bubbles, as well as their interactions with hydrodynamic flows, solid boundaries and contaminants.
